

Carbon Reduction Plan

Item	Details
Reporting Entity	ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED
Company Registration Number	02518864
Registered Address	43 Worship Street, London, England, EC2A 2DX
Publication Date	25 June 2026
Supporting Document	The detailed emissions inventory, including all raw activity data, allocation methodologies, and category-level calculations, is available as a separate reference document (Emissions Inventory-ECONOCOM.docx) and is accessible upon request to the compliance team.

Supplier name: ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED

Publication date: 22 June 2026

Compliance Standard: PPN 006 (Updated February 2025)

Introduction

This Carbon Reduction Plan (CRP) sets out the commitment of **ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED** to achieving Net Zero greenhouse gas emissions by 2050, in alignment with the UK Government's climate change objectives and the requirements of **Procurement Policy Note (PPN) 006/25**.

The document provides a transparent and comprehensive account of our organisational carbon footprint, tracking emissions from the baseline year (2021) through to the current reporting period (2025). It presents a detailed year-on-year trend analysis, identifies key

emission hotspots, outlines the carbon reduction projects already completed, and sets out a clear roadmap of future initiatives designed to reduce our absolute emissions in line with science-based trajectories.

This CRP has been prepared in accordance with the **GHG Protocol Corporate Accounting and Reporting Standard** and uses the **UK Government's GHG Conversion Factors for Company Reporting (2025)**. The supporting document, *Emissions Inventory- ECONOCOM.docx*, contains the full underlying activity data, allocation methodologies, and category-level calculations referenced throughout this plan.

By publishing this plan, ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED reaffirms its dedication to environmental stewardship, regulatory compliance, and continuous improvement in carbon management.

1. Commitment to achieving Net Zero

ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED is committed to achieving Net Zero emissions by **2050** at the latest. This commitment is consistent with the UK Government's target under the Climate Change Act 2008 and reflects our dedication to playing a significant role in the decarbonisation of the United Kingdom.

Our approach is grounded in the **Greenhouse Gas (GHG) Protocol Corporate Accounting and Reporting Standard**, utilising the **operational control** approach for organisational boundary definition. Emissions are reported in metric tonnes of carbon dioxide equivalent (tCO₂e) using the UK Government's GHG Conversion Factors for Company Reporting (2025).

2. Baseline emissions footprint

Baseline year: 1 January 2021 – 31 December 2021

Additional details: The 2021 baseline represents the earliest year for which a complete organisational carbon footprint is available. Data capture was limited to Scope 1 and Scope 2 emissions, with minimal Scope 3 data (largely incomplete). This baseline serves as a conservative reference point.

Baseline year emissions (2021):

Emissions	Total (tCO ₂ e)
Scope 1	0.122
Scope 2	0.010
Scope 3 (included sources)	0.873
Total emissions	1.005

Baseline Emissions (2021):

3. Current emissions reporting

Reporting year: 1 January 2025 – 31 December 2025

The 2025 inventory represents the most comprehensive carbon footprint undertaken to date, incorporating full data capture for employee commuting (Category 7), business travel (Category 6), and waste (Category 5).

Current year emissions (2025):

Emissions	Total (tCO ₂ e)
Scope 1	0.000
Scope 2	6.070
Scope 3 (included sources)	54.360
Total emissions	60.430

Current Emissions (2025):

Scope 3 included sources (2025):

Category	Emissions (tCO ₂ e)	Status
Category 5: Waste	0.11	✓ Reported
Category 6: Business travel	15.06	✓ Reported
Category 7: Employee commuting	37.58	✓ Reported

Carbon Reduction Plan – for the period Jan – Dec 2025

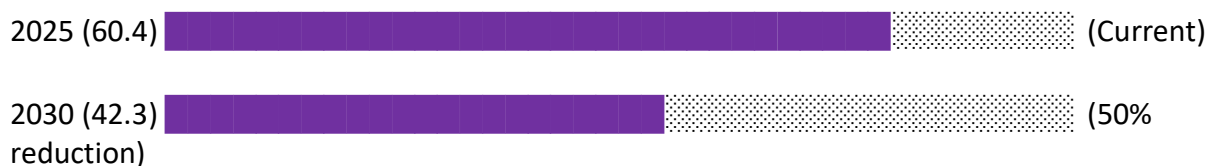

Category	Emissions (tCO ₂ e)	Status
Category 4: Upstream transport	0.00	⚠ Not applicable due to business process
Category 9: Downstream transport	0.00	⚠ Not applicable due to business process

4. Emissions reduction targets

In order to continue our progress to achieving Net Zero, ECONOCOM PRODUCTS & SOLUTIONS UK LIMITED has adopted the following carbon reduction targets:

Target	Year	Reduction vs. 2025	Absolute Target (tCO ₂ e)
Near-term target	2030	50% reduction	30.2
Medium-term target	2040	75% reduction	15.1
Net Zero target	2050	100% reduction	0.0

Progress Against Targets (Projected Trajectory):

Carbon Reduction Plan – for the period Jan – Dec 2025

Year-on-Year Emissions Report (2021 – 2025)

The table below provides a comprehensive year-on-year breakdown. **Green (●)** indicates a decrease from the previous year; **Red (●)** indicates an increase.

Year	Scope 1	Scope 2	Scope 3	Total (tCO ₂ e)	YoY Change	Trend Bar
2021 (Baseline)	0.12	0.01	0.87	1.01	N/A	
2022	0.10	0.01	0.91	1.02	● +1.4%	
2023	0.10	0.01	0.88	0.99	● - 2.9%	
2024	0.00	7.30	31.43	38.73	● +3,812%	
2025 (Current)	0.00	6.07	54.36	60.43	● +56.0%	

Key Observation: The massive increases in 2024–2025 are predominantly due to improved data capture (introduction of Commuting and Business Travel categories), rather than a true operational spike in activity.

5. Carbon reduction projects

Completed carbon reduction initiatives

Initiative	Description	Emissions Reduction (tCO ₂ e)	Status
Scope 1 elimination	Complete phase-out of gas combustion and company-owned vehicle fuel	0.122	 Complete
Enhanced data capture	Introduction of comprehensive employee commuting and business travel tracking	N/A (accuracy)	 Complete

Future carbon reduction initiatives

Initiative	Description	Target Year	Expected Reduction
Travel policy review	Promote rail over car travel; review high rail mileage (203,965 miles) against business necessity	2026–2027	5–10 tCO ₂ e
Sub-meter installation	Install sub-meters at Branch to enable accurate electricity allocation	2027	Accuracy improvement
Renewable energy procurement	Explore options for renewable electricity tariffs	2028–2029	5–6 tCO ₂ e

Carbon Reduction Plan – for the period Jan – Dec 2025

Initiative	Description	Target Year	Expected Reduction
Scope 3 data collection	Prioritise data collection for Categories 1, 4, and 9	2026–2027	Baseline establishment

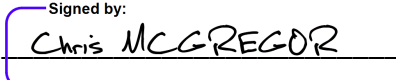

6. Declaration

This Carbon Reduction Plan has been completed in accordance with **PPN 006** and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the **GHG Reporting Protocol Corporate Standard**, and uses the appropriate **UK Government emission conversion factors for greenhouse gas company reporting**.

Scope 1 and Scope 2 emissions have been reported in accordance with **SECR requirements**, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard.

7. Sign-off on behalf of the supplier
