

# let your BOS adventure begin

## BOS: a mobile-as-a-service solution with value-add services

We live in a world where ownership is outdated. Flexible, personalised, customer-focused services offer more benefits than purchasing, without the burden of ownership. Thus, subscription-based models now prevail. At Econocom, we designed BOS, a mobile-as-a-service solution with end-to-end services, to help you upgrade your mobile fleet when needed.

← 24-month subscription service →
