LIVE TECH

i.tem simplifies technology management while promoting efficiency and sustainability. From strategic planning to asset management, i.tem is a comprehensive solution designed to meet your company's needs.

intelligent tech equipment management

Performance, control, and impact through intelligent IT lifecycle management.

i.tem transforms the management of technology equipment into a strategic lever shared by IT, finance, procurement, and sustainability departments.

Our innovative solution centralizes all key data - financial, operational, technological, and environmental - to provide a comprehensive overview and strategic management of your IT assets.

- The IT department benefits from consolidated visibility, better control over usage and renewals, and reliable support to guide technology decisions.
- Finance and procurement teams gain access to a complete view of contracts, rigorous cost tracking, an optimized ordering process, and real-time data to inform their decisions.
- The CSR department receives accurate reporting on the digital environmental footprint, enabling full integration of IT into the company's sustainability strategy.

With i.tem, you make the right decisions at the right time-turning your IT assets into a truly strategic, sustainable, and shared advantage.

Discover the power of i.tem for your business.

the advantages

“ Thanks to i.tem, we were able to optimize our asset management processes and reduce our operational costs.

Their ability to analyze data made it easier for us to make informed decisions. ”

SIMPLE

With an intuitive and user-friendly interface, our solution ensures complete transparency and precise management at every stage of the asset lifecycle. Full digitization of processes simplifies equipment management, making it smooth, efficient, and accessible for faster and better-informed decision-making.

PRÉVISIBLE

Gain complete and reliable visibility over the management of your contracts and assets. From order placement to delivery and equipment return, a fully digitized workflow guarantees rigorous tracking and optimized management by contract, asset, and usage.

IMPACT

Automating processes throughout the asset lifecycle streamlines daily operations, reduces costs, and minimizes human errors, freeing up time for high-value strategic tasks. Moreover, with i.tem, accurate carbon footprint measurement enables you to embed a responsible and sustainable digital strategy.
